France

May 7<sup>th</sup>, 2019

Dear Mr Raymond

I can confirm that World Rugby has received the test report dated October 5<sup>th</sup>, 2018 from Axis Metrologie, a World Rugby Test House, in relation to the Smart Power stud. This test report demonstrates that the Smart Power stud complies with the performance requirements set out in the World Rugby Performance Specification for Studs & Outsoles.

While this requirement is voluntary these studs should be permitted to be used in any rugby match assuming that the wear and tear on them is not excessive or of a type that might result in them no longer meeting the performance requirements, noting of course that any referee, pursuant to World Rugby Law 6, "has the power to decide at any time that part of a player's clothing is dangerous or illegal".

Yours sincerely
